## The Haute Verrière – Jean Leroy’s loop.

**START : The Haute Verrière, Lépanges sur Vologne**

**To join the starting point by car:**

Leave Bruyères in Remiremont's direction. 800 meters after Laval Sur Vologne, turn right in Fays' direction. Right after Fays' city sign, turn left on Rue de La Roche, then Rue de la Basse, then on Rue de Saint-Pierremont. Keep driving until the Lépanges Sur Vologne's city sign. Then turn right and continue on this road for 2km (1,24 miles). After 100 meters on a dirt road, you're finally arrived (The hunting lodge)

With respect to your arrival point, turn right on the edge for 200meters. Enter to the left, in a charming beech forest, towards the Cross of Faîte. After the information board about the crossed forests, continue to the left in a forest pathway, then in the turn, at 200meters, go down the pathway to the left. It is turning to the left during 100meters, to the right during 200meters, and do not miss a steep and quite long descent. Down there, go to the right and soon you will be walking on a larger forest pathway. At the next intersection, close to a little creek, continue on

your right then to the left. You're discovering the hamlet of Void de la Borde, municipality of Viménil. Cross the town and continue on this tarred road. You will see a large view on the plateau of Lorraine and then on the city of Viménil, nestled around the crops.

Before the playground and the information board, go to the left in the forest (a picnic table is at your disposal). As soon as you can see the farm of La Clairière de la Basse Verrière, go to the left uphill. At the top, at the intersection, continue to the right then soon to the left and you will find a forest pathway. Continue on this path to the right slightly uphill. At the picnic point enjoy the pathway that leads to the Marie's water source. Slowly get back to your climb. Deciduous trees (oak and beech), resinous (firs, spruce, even larch) will join you.

At the first intersection, go to the left and stay on this forest path until arriving at the top. It still remains a little part of flat pathway until going back to La Clairière de la Haute Verrière, your starting point.
